MAXWELL AHIAKPOR

Accra, Ghana | +233 242 546 338 | ahiakpormaxwell32@gmail.com | github.com/Maxzy32

PROFESSIONAL SUMMARY

Software developer and IT professional experienced in hospital information systems, full-stack application development, clinical workflow enhancements, reporting, and third-party integrations. Hands-on experience supporting Health Pro and GHIMS, building solutions with JavaScript, Node.js, React, SQL, and Classic ASP/VBScript. Interested in scalable, human-centered digital systems for healthcare and education.

TECHNICAL SKILLS

Languages & frameworks: JavaScript, Node.js, Express.js, React, Next.js, Java, HTML, CSS, Tailwind CSS, Classic ASP/VBScript, Python/Django, Dart, React Native.

Data & infrastructure: PostgreSQL, MySQL, SQL Server, Sequelize, Redis, BullMQ, Socket.IO, Git/GitHub, REST APIs, Docker, Render.

Specializations: EMR/HIS workflows, clinical reporting, systems integration, user access administration, debugging, technical support, software testing.

PROFESSIONAL EXPERIENCE

SPAGAD TECHNOLOGIES | Assistant Software Developer / Design | 2026–Present

- Develop, maintain, troubleshoot, and enhance Health Pro and GHIMS hospital management systems; translate hospital departmental requests into functional changes, reports, and workflow improvements.
- Records Module: support patient records workflows, demographic data capture, registration-related enhancements, departmental reporting, and records management requirements.
- EMR Module: develop and modify clinical forms, diagnosis and vital-sign reports, discharge summary requirements, patient documentation checks, and admission/discharge workflows.
- Blood Bank Module: work on blood group result retrieval and mapping between laboratory result components and configured blood group tables to support clinical data display.
- SMS Integration: implement and troubleshoot SMS gateway connectivity, appointment messages, message scheduling, delivery processing, and notification workflows.
- New hospital profile setup: configure new facility profiles, system settings, access rights, user accounts, and department-specific reporting requirements.
- Billing Module: enhance billing-related reports and workflows, including receipt adjustments, admission charge handling, and discharge-pending-billing reporting.
- Support hospital users through incident investigation, account administration, testing, training, and coordination with clinical and administrative teams.

37 MILITARY HOSPITAL | National Service, Health Information Department | 2024–2025

- Supported the Health Pro EMR system, assisted with account provisioning, password resets, account status changes, and first-line troubleshooting.
- Collected and escalated departmental issues to the EMR/IT teams and supported hospital staff with system access and operational queries.

SHARPNET COMPANY LIMITED | Sales and Customer Service Experience | 2023–2024

- Managed customer inquiries, provided product information, and supported customer satisfaction through responsive service.
- Applied sales techniques to support sales targets and assist customers in selecting suitable products.
- Built effective customer relationships through clear communication and professional interpersonal skills.
- Resolved customer complaints and service issues promptly to maintain positive customer experiences.

- Maintained accurate sales and inventory records to support stock management and timely reordering.

SELECTED PROJECTS

Hospital Referral Management System | Full-stack project — ongoing

- Building a hospital-to-hospital referral platform with approval workflows, role-based access, secure integration API keys, document attachments, QR-assisted confirmation, and audit logging.
- Using React, Node.js/Express, PostgreSQL, Sequelize, Socket.IO, Redis, and BullMQ for real-time updates and asynchronous notifications; deploying services with Render and managed Redis.

Multi-School Management System (Ghana) | Architecture and planning — ongoing

- Designing a multi-tenant platform for public and private primary/JHS schools, including digital classrooms, assessments, teaching resources, communication, calendars, and notifications.
- Planning academic progress books, term report cards, historical transcripts, configurable school policies, and future student transfer support.

Network Monitoring System | Backend development — ongoing

- Developing an agent-based monitoring platform with agent registration, API-key authentication, heartbeat endpoints, online/offline status tracking, and PostgreSQL-backed device records.

Biometric Fingerprint Attendance System | Academic project

- Developed a Java-based student attendance system using DigitalPersona fingerprint technology and database-backed attendance records to reduce manual entry.

EDUCATION & TRAINING

ALX | Professional Backend Development Course | 2025

Ghana Communication Technology University | BSc, Information Technology | 2021–2024

Bishop Herman College | 2016–2019

ADDITIONAL STRENGTHS

Requirements analysis • Cross-functional collaboration • Communication • User training • Problem-solving • Attention to detail
